27         /* 'about' content:
28
29         Hi, I'm Jonathan. I have recently built a responsive website with a bespoke, secure content
30         management system using PHP and MySQL. As part of this application, I have included the final
31         evaluation I wrote to accompany the submission of the website (Critical Evaluation.pdf).
32
33         I am currently developing 3 applications that will be available to use on Android, iOS and
34         Windows smartphones / tablets - namely a Cheltenham tourism app, an eLearning app and a career
35         advice app for university students; development for all three includes PHP and SQL. */
36
37         echo $row['suitability'];
38
39         /* 'suitability' content:
40
41         I have experience of building and maintaining a website with multiple user accounts.
42
43         I am currently learning about MVC development and also furthering my knowledge of CSS by using
44         SCSS to develop the aforementioned career advice app. I am very comfortable using jQuery and
45         my knowledge of JavaScript is always growing.
46
47         Among others, I have experience using IDEs such as DreamWeaver, Brackets and Intel XDK.
48
49         More information about me and examples of my work can be found at:
50         Portfolio ↗
51         Behance ↗
52         LinkedIn ↗ */
53
54         echo $row['feedback'];
55
56         /* 'feedback' content:
57
58         I'd love the opportunity to talk face-to-face about the job and discuss the details of the
59         role further with you.
60
61         Kind regards,
62         Jonathan. */
63
64     }
65
66     ?>
